

Survey Research Specialist

Survey Research Specialist

Full-time

Remote Work Environment

Submit a cover letter and resume to: careers@hyperionres.com

By joining the Hyperion Research team, you will work alongside some of the most respected HPC industry analysts. For more than 30 years, Hyperion Research analysts have helped senior government and university officials, IT professionals, business executives, and the investment community make fact-based decisions on technology purchases and organization strategies in the Americas, EMEA and Asia-Pacific markets.

You will work closely and collaboratively with Hyperion Research analysts and clients throughout the survey process. We value professionalism, working as a team, confidentiality, collaboration, and insightful thinking.

Responsibilities Include:

- Using Hyperion Research-designed questionnaires, conduct survey interviews (mostly via phone calls, or in person as necessary) in a professional manner, adhering to agreed-upon parameters. Research will require occasional U.S. and international travel.
- Input the survey results into an Excel spreadsheet
- Manage deadlines
- Help manage external survey houses on each project
- Coordinate survey logistics, and troubleshoot as needed
- Monitor data collection to ensure all surveys are progressing at targeted levels

Desired Skills and Attributes:

- A high interest in conducting surveys with respondents
- Understand the survey process steps, e.g., locate respondents, schedule time to conduct survey(s), conduct survey(s), input responses into Excel spreadsheet
- Excellent organizational skills and attention to detail
- Excellent interpersonal and communication skills
- Ability to accept feedback and constructive criticism positively
- Confidential and sensitive information handling skills

Experience Requirement:

- Minimum 3 years of experience in the research field, conducting surveys, and survey-based studies

- Strong professional writing experience preferred

Education Requirement:

- Bachelor's degree or above

What we offer:

- Competitive base salary
- Flexible, remote work environment
- Excellent benefits
- Positive team culture

About Hyperion Research:

Hyperion Research provides data-driven research, analysis and recommendations for technologies, applications, and markets in high performance computing and emerging technology areas to help organizations worldwide make effective decisions and seize growth opportunities. Research includes market sizing and forecasting, share tracking, segmentation, technology and related trend analysis, and both user & vendor analysis for multi-user technical server technology used for HPC and HPDA (high performance data analysis). We provide thought leadership and practical guidance for users, vendors and other members of the HPC community by focusing on key market and technology trends across government, industry, commerce, and academia.
